

مؤسسة بن مالك للتجارة والمقاولات العامة
BinMalik Est. For Trading & General Contracting

Oil & Gas Sector Profile

 www.binmalik.com

Over the past years our organization has successfully built ten strategic sectors of it's activities. These strategic sectors of activities are fully integrated to achieve the objective of the customers.

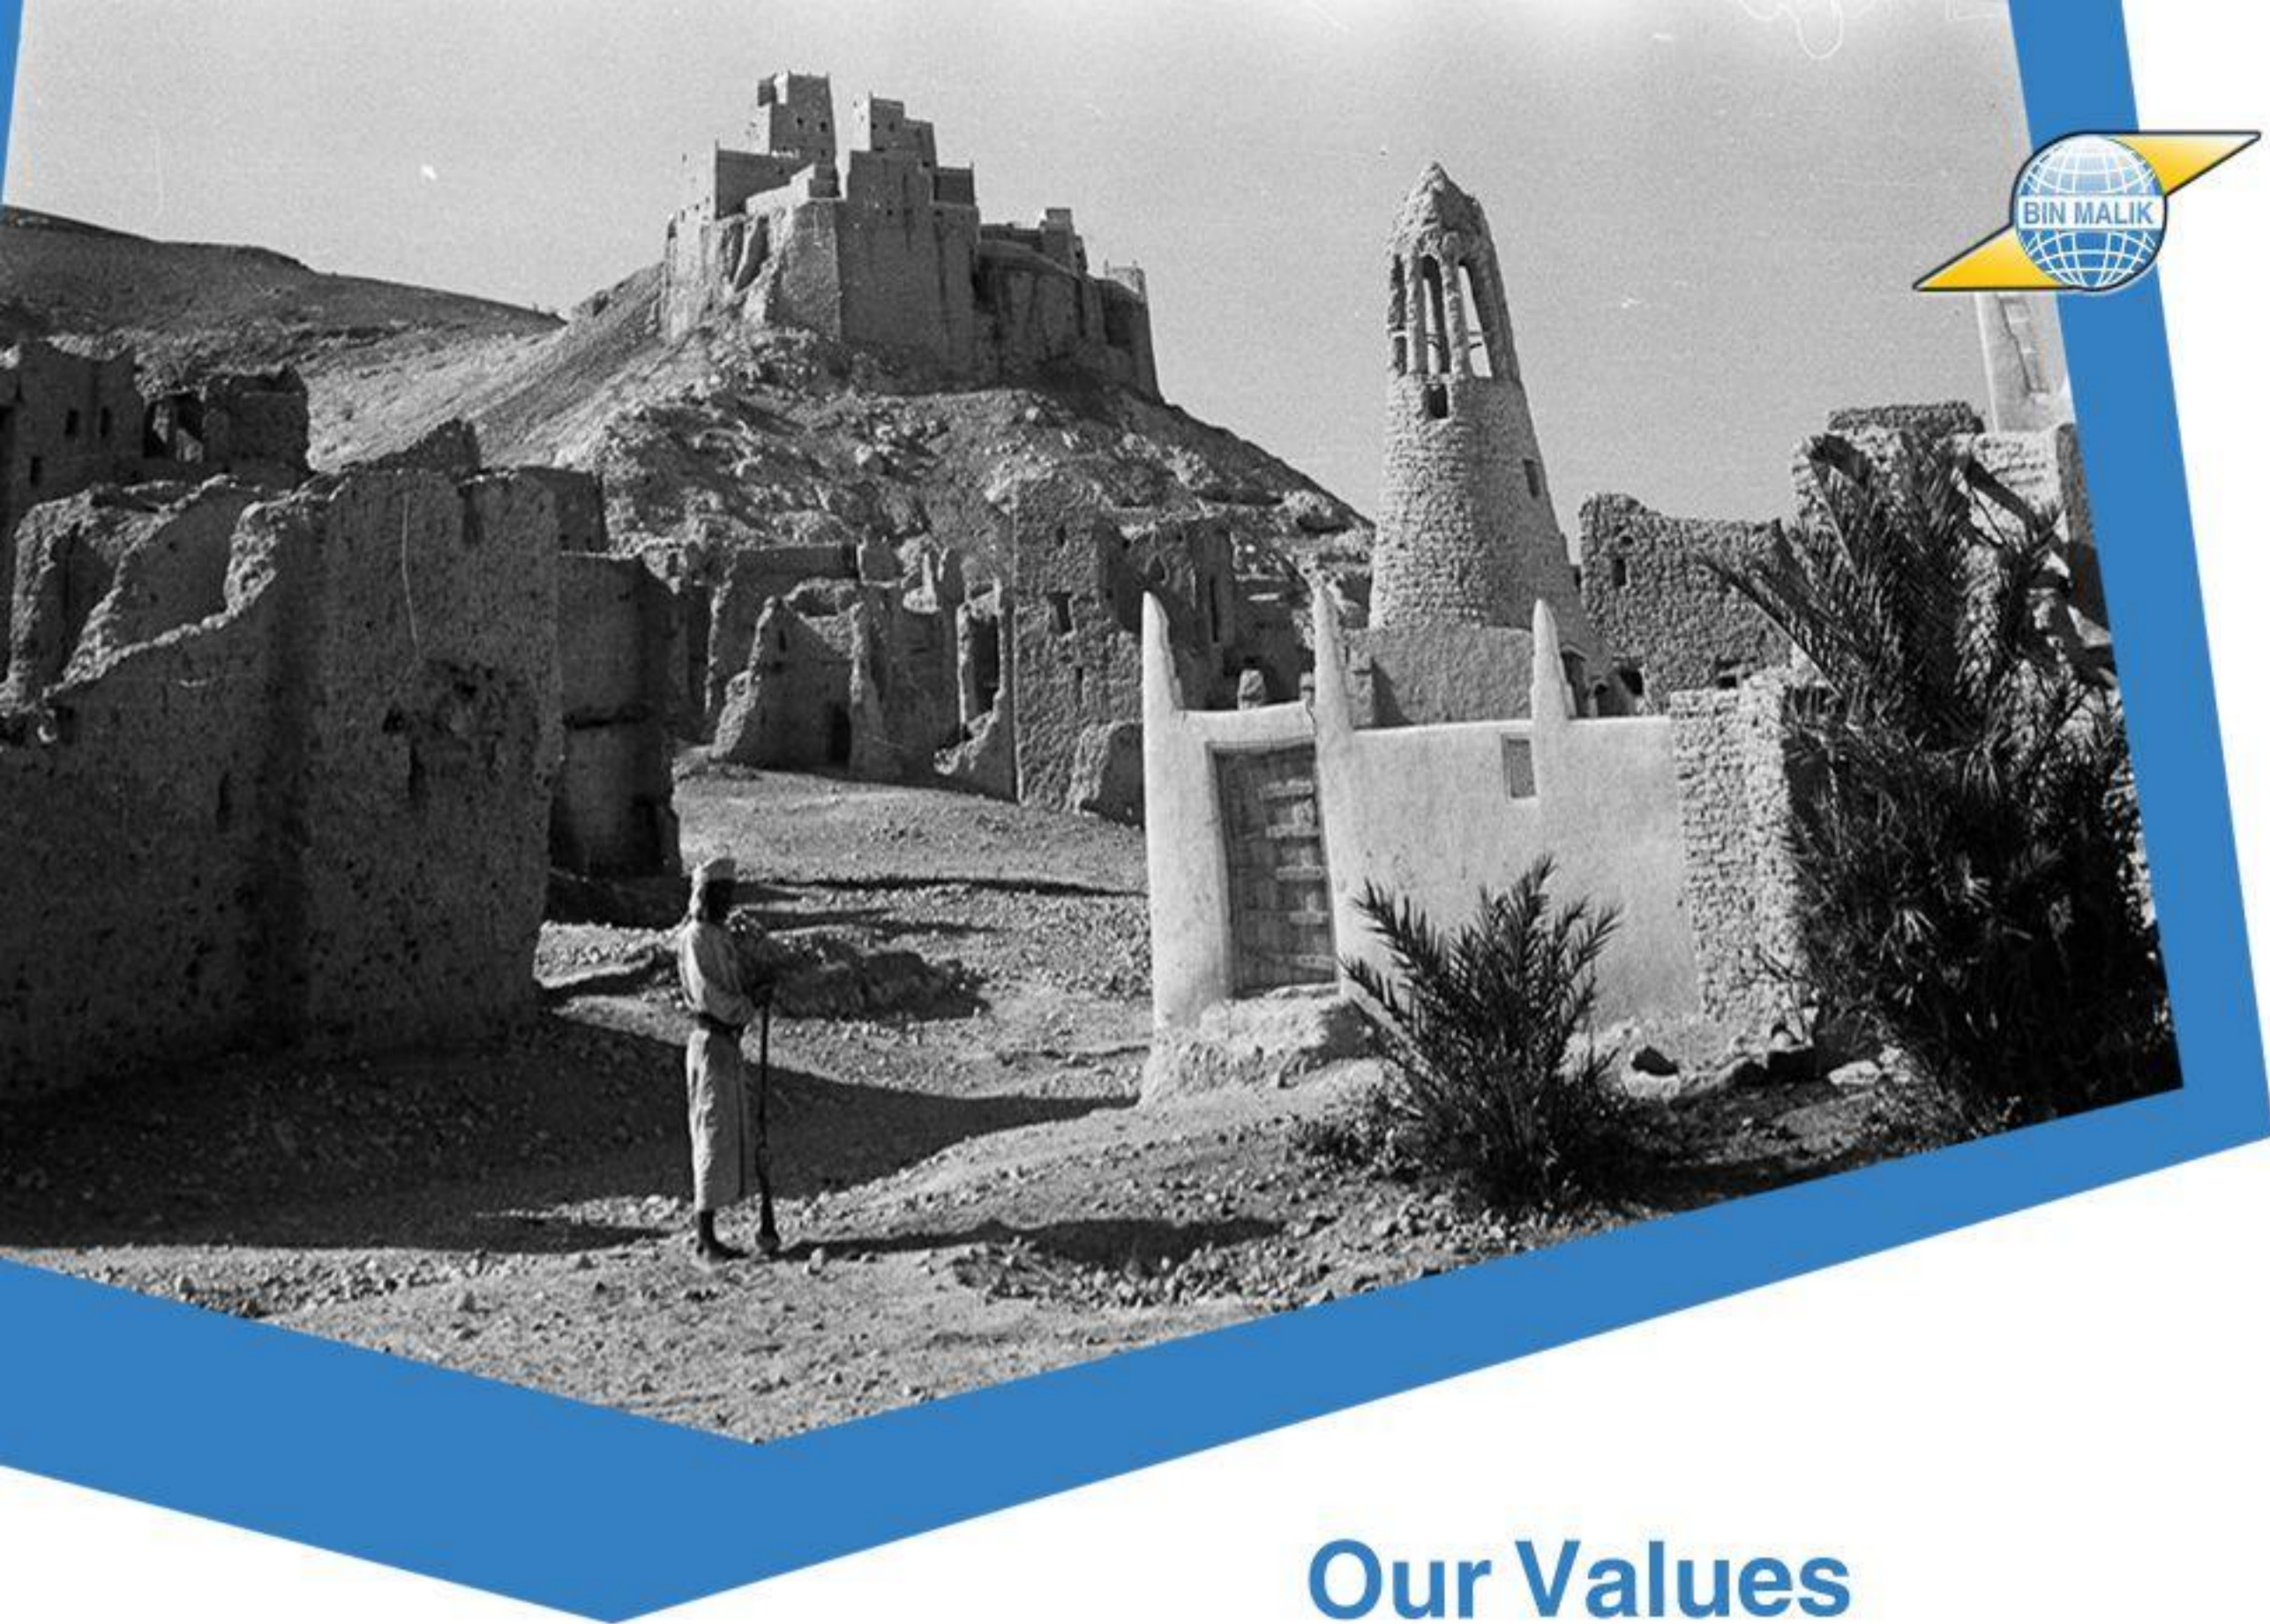

Our Mission

We strive to provide the best and highest services in accordance with international standards, methods and policies of management, quality and workmanship to the satisfaction of God and achieve the interests of worshipers while preserving the constants and values of legitimacy present and future.

Our vision

The scene is at the forefront of major financial houses in Yemen to serve Hadramout and all the countries of Yemen land and human and maintain the classification of the first class in all areas.

Our Values

At Bin Malik Est., our values are proudly inspired by Islamic Shariah principles. These values are deeply rooted on Islamic principles related to works. They draw from our rich heritage, the latest expertise and the most modern technology. They are guided by proven practices for creating innovative and world-class investment products. These products and services are now available for a select and elite group of customers that we seek to join us on our road to long-term growth and success :

- 🔹 Integrity
- 🔹 Transparency
- 🔹 Justice
- 🔹 Cooperation and Teamwork
- 🔹 Loyalty and Commitment
- 🔹 Excellence

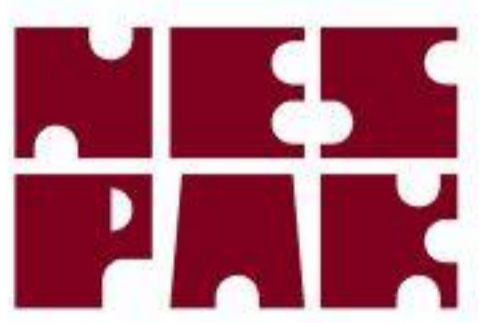

Our staff ..

Pillar of our success

BM adopts the hiring and recruitment policies for workforces primarily and basically from the area of Hadhramout wherever available. Thus most of our workforces are composed of Yemeni Nationals. They constitute about 90% of the total workforce along with some specialized expatriates. Our workforces include engineers of great skills and high experience in the designing and field works, survey engineers, and professionals in the works of logistic support, quarry diggers, plasterers, tradesmen, technicians, operators of light and heavy machinery and car drivers.

There are also quiet a number of training programs for the development of performance, skills, and for acquiring the essential experiences.

Our Clients

HSE Policy Statement

Bin Malik Est. is committed to a safe and healthy work environment for all employees, sub-contractors, clients and the public at large.

TO WHOM IT MAY CONCERN
IN YAMEN OILFIELD INDUSTRIES

WE HEREBY GULF ENERGY INTERNATIONAL , WITH ITS HEAD OFFICE IN EGYPT AND BRANCHES IN SAUDI ARABIA , KUWAIT , SYRIA , PLEASED TO INFORM THAT BIN MALIK ESTABLISHMENT IN YAMEN IS REPRESENTING GULF ENERGY IN YAMEN FOR THE TIME BEING UNTIL ESTABLISHED OUR COMPANY IN YAMEN FOR THE FOLLOWING SERVICES

- 1- TUBULAR INSPECTION
- 2- RIG INSPECTION
- 3- DRILLING STRING INSPECTION
- 4- LIFTING GEAR INSPECTION
- 5- DROPS SERVICES
- 6- REFURBISHMENT SERVICES

BEST REGARDS

RAOUF ZEINHOM
GENERAL MANAGER

Handwritten signature and date: 8/5/2017

Inspection & certification

Bin Malik Est. is an agent for Gulf Energy offers a full range of inspection and certification services, and is widely recognized as one of the leading authorities in the region.

Tubular inspection

We offer a full range of tubular inspection services, as well as a variety of related support activities.

The core service includes inspection of:

- Pipe management systems.
- ASNT level III services.
- NDT services (ET, MT,PT,RT,UT,VT).
- Drill stem inspection (API, DS-1, NS-2, SOP, client).
- OCTG examinations (API 5A5, 5CT, 4-functional EMI).
- Tubular renovation (cleaning & protection).
- Rig parts & handling tools.

We also offer general mechanical testing & analysis, QA/QC technical auditing, and client care courses and seminars, which can be tailored to the requirements of the individual client, as well as the following equipment and services OCTG & Tubular Products:

- | | |
|--------------------------------|--------------------------------|
| • Bucking units | • Demagnetization |
| • Eddy current | • Electromagnetic inspection |
| • External & internal cleaning | • Hardness testing |
| • Hot-spot units | • Magnetic particle inspection |
| • Penetrant testing | • Pipe straightening |
| • Protective coating | • NORM Survey |
| • Rattling | • Re-facing |
| • Visual testing | |

Non-destructive test (NDT) inspection

We undertake non-destructive testing (NDT) using:

- Magnetic particle inspection - proven and reliable, MPI uses magnetic field patterns to detect surface/near-surface flaws in ferrous materials
- Dye penetrant inspection – DPI is the fast, low-cost means of detecting surface-extruding flaws such as cracks or porosity over large areas
- Eddy current inspection - used to detect surface extruding defects such as fatigue without the need to remove protective coatings.
- Ultrasonic inspection – a quick and highly precise method for establishing the presence, extent and type of flaws in most materials.

Drops services inspection

Dropped objects considerations are integral to the entire process of everything we supply, from design and build through to delivery and installation.

While ensuring maintenance of the highest standards throughout, we take an early and proactive approach, eliminating the maximum possible number of faults/failures on-site, to minimize the need for subsequent remedial action.

Surveys can be tailored to client requirements, but typically include:

- Derricks & masts
- Mass
- Jack house & legs
- Moon pool/Texas deck
- Leg columns
- Helideck structure
- Travel/PH equipment
- Substructure.
- Rig equipment
- Deck & gantry cranes
- Flare stacks
- Internal areas, mud room etc.

In all cases, we can provide:

- Inspection teams
- Depth of service
- DROPS management systems
- Survey reporting

Lifting equipment inspection and testing

Our surveys provide an accurate register and database report system covering all onboard hoisting and lifting equipment, from shackles and slings to lifeboats and off shore cranes.

- ⚡ All inspections to manufacturers' guidelines and relevant API, BS, Euro norms in conjunction with LOLER SI 2307/1998.
- ⚡ CD-ROMS are provided, with full database providing identification number, description, safe work-ing load, test certificate number and details of previous inspections.
- ⚡ Surveys generally combined with those for hoisting and lifting equipment, providing full inspection coverage of all such equipment.
- ⚡ Internet-based reporting gives clients full and easy access to status of all equipment.

Drilling derrick and mast inspection

We offered the following Services:

- ⚡ Gin pole construction, including platforms, ladders, braces safety gates, connection plates, bolts and fasteners.
- ⚡ Upper and lower derrick stem sections, including all platforms, ladders, braces safety gates, connection plates, bolts and fasteners
- ⚡ Dolly track, including all Y-frame support beams, beam clamps and joint couplings, and dolly carriage guide rails, including upper, middle and lower sections
- ⚡ Racking board area, including support frames, fingers straightness, latches, fingerboard access and all bolts and fasteners
- ⚡ Racking system, including all racking board supports, platforms and system supports, derrick outfi ttings, including wind walls, and any pipework, such as vent lines or HP mud lines, derrick safety slings and lifting equipment
- ⚡ Derrick structure footings, derrick structural general condition, and percentage bolt tight-ness check, if required.

➤ Safety & Environmental Services

We offer the following services:

- ⚡ Development of corporate chemical management strategies and security of supply
- ⚡ Resolution of complex issues of health and safety, product liability, human health and environmental protection .
- ⚡ Cost effective workplace risk assessment and management of workplace hazards .
- ⚡ Development and delivery of bespoke education and training .
- ⚡ spill control .
- ⚡ Supply all Kinds of safety requirements .

To Whom It May Concern

This is to certify that I have been working with Ben Malik Company personnel for the past 12 months during the construction of the YLNG Training Centre at Balhaf site. They always exhibited a professional attitude toward work and were very cooperative and willing to find a consensus during discussion. Many additional work were carried out upon request of the client without going through complicated procedures. The management of the Company is easily accessible and spend a lot of time on the workplace motivating his personnel. To conclude, the choice of Ben Malik Company to build this Training Centre has been an excellent decision.

Baker Oil Tools

13th April 2007

To whom it may concern,
Bin Malik company have been providing vehicles and services for Baker Oil Tools for the last seven years. During this period we have never had any problem with the service. They have dealt with repairs / damages / monthly service etc. in a prompt ,professional and timely manner. In conclusion I would have to say the level of service has been excellent I would recommend Bin Malik to any company who would wish to deal with them in the future.

This memo is to confirm that Bin Malik have successfully completed a number of civil construction projects for Nexen. Some of the projects are as follows:

- Constructed a re-enforce concrete foundation for a new 2000 hp Main oil Line pump
- Complete foundation work for 3 Hydrocyclone faculties throughout Masila which included foundations for vessels, pumps, pipe supports and building structures.
- Constructed a concrete foundation for a Caterpillar engine rebuild shop that included large structures to support a 20 ton overhead crane.
- They did considerable precast work that included pipe supports for pipelines, U blocks for pipeline crossings, concrete beams for supporting our well site equipment and concrete sumps.
- They organized and constructed a new Mosque at the Nexen CPF and did finishing work on the Nexen Block building accommodations.
- They have experience at our loading Terminal doing tank foundations and pipe supports.

During several of these activities Bin Malik have worked inside operating facilities and have shown to be a very safety conscious and a capable organization.

Dated: 01 December 1993

TO WHOM IT MAY CONCERN

This is to express our appreciation to BIN MALIK ESTABLISHMENT for their work performed for G & G International NV.

G & G International was employed by Canadian Oxy Offshore Ltd, as a Main Contractor, to engineer, supply and installs 32 Welded Storage Tanks at their Export Terminal and Central Processing Facilities located in Dahabab and Masila respectively.

During the period from August 1992 up to end of November 1993, BIN MALIK ESTABLISHMENT were employed by G & G International as Sub-Contractors to perform the following work:

- Construction of concrete block foundations for temporary camp facilities
- Construction of temporary concrete buildings for housing and storage facilities
- Installation of temporary underground piping and septic tank
- Supply of potable water for camp facilities
- Other general civil works

BIN MALIK ESTABLISHMENT performed their work diligently in accordance with the scope and terms of their subcontract and we will have no hesitation in employing them in future, if necessary arises, and recommend them to any other company to perform similar work.

This Contractor participated in major construction and civil projects and also the provision of Logistics Manpower on site.

Contractor being fully aware of the YLNG HSE rules conducted all the tasks safely and without any reported injuries.

We therefore won't hesitate to recommend this Contractor to any Clients that will require such services in future.

Yours sincerely,

Zulkarnain ZULKARNAIN
Head of Support Services,
Yemen LNG Balhaf.

Certificates Of Honor

Certificates Of Honor

During my tenure as Engineering and Construction Manager for Nexen Yemen, Bin Malik was responsible for all road and lease construction and maintenance in Masila (Block 14). Nexen had up to 6 drilling rigs operating at the same time and the level of work activity was extremely high. Bin Malik was very cooperative and was always able to provide the equipment and resources required to "get the job done" and complete the road access and leases on time. Nexen never incurred rig stand-by time due to late lease construction. After heavy rains, extra effort was put in to repair roads as required to regain access to the producing wells.

In addition, the Bin Malik Management Team was very cooperative. The Company is from the Hadramout, and an integral part of the "Bedouin community". They treated their employees well and their medical clinic was available to anyone who needed assistance--even if they were not related to the Company.

I found the Management Team to be honest, sincere, hard working and very hospitable.

*Bill Ibbitson
E&C Manager*

Certificates Of Honor
